DESCRIPTORS *Annotated Bibliographies, *Bibliographies, *Exceptional Child Education, *Physically Handicapped, *Special Health Problems

ABSTRACT

Contained in the bibliography are 77 references to texts, journal articles, program guides, research and medical reports, and other literature on physically handicapped children and children with other special health problems. The bibliography is one in a series of over 50 similar listings on handicapped and gifted children. For each of the references, which were selected from Exceptional Child Education Abstracts, bibliographic data, availability information, indexing and retrieval descriptors, and an abstract are given. Also provided are author and subject indexes. (KW)

This bibliography is a product of the Information Processing
Unit, CEC-ERIC Information Center on Exceptional Children.

The work presented or reported herein was performed pursuant to a grant from the Bureau of
Education for the Handicapped, US Office of Education, Department of Health, Education, and
Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy
of the US Office of Education and no official endorsement by the US Office of Education should
be inferred.

The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Instructional Materials Centers Network for Handicapped Children and Youth (IMCNHCY). In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

How to Use This Bibliography

The abstracts in this bibliography have been retrieved from the computer stored information of the CEC Information Center on Exceptional Children. Abstracts represent the Center's complete holdings on the topic as of the date indicated.

How to Read the Abstract

Each abstract contains three sections---bibliographic data, descriptors, and a summary of the document. The bibliographic section provides the document's identifying number (ED and/or EC), publication date, author, title, source, and availability. The descriptors indicate the subjects with which a document deals. The summary provides a comprehensive overview of the document's contents and in some cases document availability is announced here.

How to Use the Indexes

Some bibliographies in *Exceptional Children Bibliography Series* contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

How to Purchase Documents

For documents available from their publishers, information on price and address is included in the abstract.

Many documents may be purchased in microfiche (a 4" x 6" microfilm card containing up to 70 pages of information) and/or hard copy (readable size photo reproduced pages) reproduction from the ERIC Document Reproduction Service. For example, "EDRS mf" indicates the document may be purchased in microfiche reproduction and "EDRS mf, hc" indicates the document may be purchased in both microfiche and hard copy reproduction.

To determine purchase price for hard copy multiply the document's number of pages by \$.05, then add \$.10. To determine purchase price for microfiche, use the table below. For example a 44 page document in hard copy would cost \$2.30 (44 x \$.05 + \$.10) and in microfiche would cost \$.25.

To order document reproductions, provide the ED number of the desired document, the number of copies being ordered, and the type of reproduction desired (microfiche or hard copy). Payment must accompany orders totaling less than \$5. Add a special handling charge of \$.50 to all orders. The ERIC Document Reproduction Service is registered to collect sales taxes. Orders from states which have sales tax laws should include payment of the appropriate tax or tax exemption certificate. A 25 percent service charge, calculated to the nearest cent, must accompany orders from outside the United States, its territories, and possessions.

Orders should be sent to:

ERIC Document Reproduction Service
National Cash Register Company
4936 Fairmont Avenue
Bethesda, Maryland 20014

ABSTRACT 10058

EC 01 0058 ED 014 821
 Publ. Date 28 Feb 66 31p.
 Mc Cann, Cairbre
Development and Evaluation of Adaptive Communication Devices for the Severely Handicapped Child.
 Crotched Mt. Found., Greenfield, New Hampshire
 EDRS mf,hc

Descriptors: exceptional child research; physically handicapped; communication (thought transfer); cerebral palsy; communication problems; electromechanical aids; adolescents; adults; children

A sample of 13 severely involved, cerebral palsied clients (12 children, one adult) participated in this study. Degree of neuromotor disability was determined by a scale based on activities of daily living. A psychological evaluation was made of all subjects in the study. Subjects were evaluated in their use of electronic switches connected to various output devices ranging in complexity from a simple series of lights to a specially modified electric typewriter. Successful use of these devices has implications for recreation, education, communication, and therapy. Switch controls that were developed included a joystick, a set of mercury switches mounted on a hat, a miniature joystick held between the teeth and operated by the tongue, a pneumatic control hemispherical joystick for a palmar surface control, several magnetically activated devices, and a horn button switch. Output devices included a display board with four lightbulbs. Etch-a-Sketch drawing toy strip projector and electric typewriter control device. Subjects were evaluated on time lapse between request for response and response and adequacy of response. The appendixes include activities of daily living evaluation form, information on subjects tested and photographs of the input and output devices tested. (GB)

 Cruickshank, William M.
Cerebral Palsy, Its Individual and Community Problems.
 EDRS not available

Descriptors: exceptional child education; physically handicapped; multiply handicapped; cerebral palsy; intelligence tests; speech handicaps; personality; language handicaps; aurally handicapped; visually handicapped; physical therapy; occupational therapy; mental retardation; parent education; vocational counseling; parent counseling; vocational rehabilitation; employment; community planning; social work; medical services; clinical diagnosis; parent attitudes; community attitudes; Bender Visual Motor Gestalt Test

In this revised edition, illustrated with

98 figures and tables, some original chapters have been expanded and new chapters have been added. Contributing authors are listed, and include educators, clinical workers, and administrators in the field of cerebral palsy. References and notes conclude each chapter, and several chapters have sections on related reading. A general index and author index follow the text. Chapters are listed under general area headings of (1) diagnosis and assessment (scope of the problem, medical aspects, intelligence evaluation, personality characteristics), (2) avenues to communication (speech and language problems, hearing problems, visual disorders), (3) therapy and education (physical therapy, occupational therapy, educational planning, mental retardation), and (4) planning for life adjustment (parent counseling and education, social casework, vocational guidance, employment, total community planning for individuals with cerebral palsy). The book is intended for students, professional workers, and others interested in the problems of cerebral palsy. This document is available from the Syracuse University Press, Box 87, University Station, Syracuse, New York 13210 for \$10.95. (JD)

ABSTRACT 10115

EC 01 0115 ED 015 573

 McDonald, Eugene T.;
Cerebral Palsy, Foundations of Speech Pathology Series.
 EDRS not available

Descriptors: exceptional child education; identification; speech therapy; physically handicapped; physical therapy; speech handicapped; cerebral palsy; language development; children; etiology; medical evaluation; multiply handicapped; neurologically handicapped; neurology; speech; speech evaluation; speech instruction; classification

This introductory text on cerebral palsy is divided into two sections. The first section of the book contains information about understanding the meaning of cerebral palsy, programs for those with cerebral palsy, the neurological bases, etiology, diagnosis, and the classification of cerebral palsy. Problems often associated with cerebral palsy are briefly discussed as are the types of therapy employed in treatment. The last two chapters are concerned with diagnosis and treatment of language and speech problems. Each of the chapters has a series of suggested readings and questions about the topic. A 195-item bibliography is included. This document is available from Prentice-Hall, Inc., Englewood Cliffs, New Jersey, and is available for \$4.95. (GB)

ABSTRACT 10121

EC 01 0121 ED 016 319
 Publ. Date 66
 Fait, Hollis F.

Special Physical Education, Adapted, Corrective, Developmental.
 EDRS not available

Descriptors: exceptional child education; curriculum; physical education; handicapped children; children; psychological characteristics; program administration; teaching procedures; visually handicapped; aurally handicapped; cerebral palsy; orthopedically handicapped; cardiac (person); mentally handicapped; socially maladjusted; mental illness; mental retardation; nutrition; games; physical fitness; dance; older adults

Written for prospective physical education teachers in a variety of settings, the book has three objectives--(1) to introduce briefly the nature of various handicapping conditions, (2) to delineate their psychological implications, and (3) to suggest suitable games and activities. Historical background, a basis for understanding the handicapped, administrative principles, and characteristics of an effective adapted physical education program are provided. The following disorders are considered--visual handicaps, auditory handicaps, cerebral palsy, orthopedic defects, heart conditions, convalescence, nutritional disturbances, other physical conditions requiring adapted physical education, mental retardation, social maladjustment and mental illness, and aging. The following activities and topics are treated--basic skill games, rhythms and dance, individual sports, dual games, team games, swimming, weight training, outdoor education, corrective body mechanics, and developmental programs for physical fitness. An appendix includes suggested films and filmstrips for teachers, film sources, record sources, professional organizations, societies and associations, and periodicals. This document was published by the W.B. Saunders Company, Philadelphia, Pennsylvania. (DF)

Some Colleges and Universities with Special Facilities to Accommodate Handicapped Students, a Directory.
 Office Of Education, Washington, D. C
 EDRS mf,hc

Descriptors: exceptional child education; physically handicapped; physical facilities; orthopedically handicapped; colleges; universities; directories; special services; physical education; vocational rehabilitation; special counselors; counseling services; federal programs; handicapped; college buildings

The directory lists 190 United States colleges and universities enrolling more than 1000 students in 40 states and the District of Columbia which provide at least two of six conveniences for handicapped students--(1) on-campus housing ramps, (2) classroom ramps, (3) library

ramps, (4) beveled curbs, (5) reserved parking, and (6) modified toilet facilities. The directory also indicates the presence of related services--special counselors, regular vocational rehabilitation, service visits, and adapted physical education. Further descriptive information about each institution includes location, control (public or private), length of program offered, type of student body (coed, male, female), and whether the institution participates in the Public Law 85-926 (as amended) Traineeship-Fellowship Programs. The directory notes other federal financial aid programs briefly--college work-study programs, National Defense students loans, Educational Opportunity grants, and guaranteed loans. Also cited are some state and private sources of scholarships and loans. (DF)

ABSTRACT 10268

Phenylketonuria, a Comprehensive Bibliography, 1964.
 Children's Bur., Welfare Admin., Washington, D. C.
 EDRS not available

Descriptors: exceptional child education; mentally handicapped; bibliographies; genetics; medical case histories; annotated bibliographies; pathology; etiology; physical characteristics; child development; medical treatment; screening tests; incidence; food; biochemistry; diseases; nutrition; special health problems

Intended as an aid to professional and technical persons interested in phenylketonuria (PKU), the bibliography lists and annotates 817 items. Content divisions are (1) general-monographs and articles, (2) biochemistry--metabolism, experiments, tests, and cases in which the emphasis is on biochemistry, (3) genetics--gene studies, hereditary factors, and family trees, (4) case histories--single cases or small groups, (5) mental retardation--psychologic, neurologic, and behavioral aspects, and also brain pathology, (6) physical pathology--arrested development, motor disability, spasms, and electroencephalography, (7) dietary treatment--chemical components, synthetic foods, food stuffs and food supplements, and also menus, and (8) surveys and screening--procedure, projects, and incidence of phenylketonuria. An author index and listing of journal abbreviations are included. Foreign language articles are noted. This document is available from the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402, for \$0.35. (SB)

Convulsive Disorders in Children with Reference to Treatment with Ketogenic Diet.
 EDRS not available

Descriptors: exceptional child services;

special health problems; electroencephalography; medical treatment; children; infants; epilepsy; seizures; heredity; genetics; infectious diseases; injuries; minimally brain injured; mental development; etiology; dietetics; medical case histories; Ketogenic Diet

Written for the medical profession, this book provides information on childhood convulsions (epilepsy) and methods of treatment. Various convulsive disorders, including hypsarrhythmia, autonomic seizures, symptom complexes, febrile convulsions, and photogenic disorders, are discussed in terms of causes, symptoms, and treatment. Convulsions that are secondary to recognizable conditions (meningitis, poisonings, communicable diseases, among others) are also considered. Various factors influencing convulsions and syncope, breathholding, and hysteria in relation to convulsions are examined. The following treatments for convulsive disorders are described--electroencephalography, anticonvulsant medication, surgery, and special diets. The ketogenic diet developed by the Mayo Clinic is presented along with instructions for its use. Also discussed are the mental status of children with convulsions, activities of the epileptic child, and hereditary and genetic factors affecting childhood epilepsy. References follow each chapter. Case studies are included. This document was published by Little, Brown and Company, 34 Beacon Street, Boston, Massachusetts 02106, and is available for \$13.00. (RS)

Education of Homebound or Hospitalized Children. T C Series in Special Education.
 Columbia Univ., New York, New York, Teachers Coll.
 EDRS not available

Descriptors: exceptional child education; homebound; teaching methods; hospitalized children; homebound teachers; teaching guides; home instruction; adolescents; curriculum; diagnostic teaching; educational needs; homebound children; hospital schools; instructional programs; science education; self actualization; socialization; student characteristics; student participation; teaching procedures

Presenting a view of education for homebound and hospitalized children, this monograph shows its similarities and differences in respect to general education. Chapter 2 focuses on the teacher as a person, discussing philosophical, psychological, and sociological factors. Professional preparation and general educational preparation are also discussed. The educational setting is presented in chapter 3. The children, teacher assignment, and the instructional environment are covered. Program content, including curriculum organization and emphasis, is described in chapter 4. Chapter 5

discusses the physical, intellectual, and emotional problems of the homebound child. Pupil participation and use of available resources is emphasized in the next chapter. Chapter 7 highlights the development of self realization and socialization. The last chapter outlines issues and questions for further study. The appendixes present special teaching methods and materials used in hospital schools and techniques for teaching science to the homebound or hospitalized child. Approximately 140 references are cited. This document was published by the Bureau of Publications, Teachers College, Columbia University, New York, New York, and is available for \$1.75. (RS)

Guiding the Physically Handicapped College Student. T C Series in Special Education.
 Columbia Univ., New York, New York, Teachers College
 EDRS not available

Descriptors: exceptional child education; curriculum; counseling; administration; educational needs; college admission; physically handicapped; college curriculum; counseling programs; admission criteria; blind; cocurricular activities; college students; community organizations; community resources; counseling services; curriculum problems; deaf; federal programs; guidance counseling; hard of hearing; national organizations; orthopedically handicapped; partially sighted; state programs; facilities

The ramifications of working with physically disabled college students (including physically handicapped, deaf, hard of hearing, blind, and partially sighted) is explored in this booklet and procedures are suggested to improve educational service for them. Chapter 1 discusses the increasing enrollment of physically handicapped students in colleges and universities. Philosophical concepts related to the admission of these students and related literature concerning physically handicapped students in colleges and universities are presented. Chapter 2 describes some of the facilities necessary for the physically handicapped student. Factors such as readers for the blind, elevators for the non-ambulatory student, and other related information are discussed. The next three chapters present the admission policies, curricular and extracurricular activities, and counseling programs needed for the physically handicapped college student. The last chapter provides the resources available for personnel serving the handicapped student--local, state, and national agencies, as well as professional organizations and journals. A 68-item bibliography is included. This document was published by the Bureau of Publications, Teachers College, Columbia University, New York, and is available for \$2.75. (MU)

Psychological and Allergic Aspects of Asthma.

EDRS not available

Descriptors: exceptional child research; special health problems; asthma; allergy; psychological characteristics; medical research; theories; behavior theories; personality theories; historical reviews; psychosomatic diseases; physiology; physical health; social factors; social influences; research projects; psychiatrists; psychological needs; psychotherapy; medical treatment; conditioned response; operant conditioning

Focused historically and chosen to stimulate research in psychosocial implications of asthma, the collection contains 18 papers by different authors. Areas of psychosomatic medicine covered are (1) principles of research (one article), (2) historical developments, theoretical models, and core problems (three articles), and (3) the hypothesis, problem, and cross validation of specificity (three articles). Six papers on psychosomatic asthma treat the problems it presents, psyche and allergy, asthma and the psychiatrist, psychoanalytic principles, and psychological aspects (both personality and vocational characteristics). Experimental asthma is considered in four articles on asthma as a learned response and induced asthma in man as well as learned asthma and factors influencing the development of asthma in the guinea pig. One paper discusses treatment. Each article provides its own bibliography. This document is available from Charles C Thomas, Publisher, 301-327 East Lawrence Avenue, Springfield, Illinois 62703, for \$10.50. (JD)

Understanding Cerebral Palsy, a Handbook for Parents.

Erie County Crippled Children's Society, Pa.

EDRS not available

Descriptors: exceptional child education; physically handicapped; family (sociological unit); parents; cerebral palsy; parent role; parent attitudes; children; discipline; intellectual development

Written by a psychologist, this manual provides basic information about the nature of cerebral palsy and discusses feelings and reactions of parents of cerebral palsied children. Information about the brain and brain damage in relation to motor and emotional function, perception, and intelligence is presented. Attention is given to problems arising in the family's acceptance of diagnosis and attendant feelings of guilt. There is also discussion of discipline, education, and the question of institutional care for the cerebral palsied child. An appendix defines related terms. This document was published by the Erie

County Crippled Children's Society, 101 East Sixth Street, Erie, Pennsylvania 16501. (SB)

The Limb-Deficient Child.

EDRS not available

Descriptors: exceptional child services; adjustment (to environment); physically handicapped; orthopedically handicapped; medical evaluation; physical therapy; amputees; prostheses; anomalies; children; cosmetic prostheses; etiology; medical services; parent counseling; physical activities; physical handicaps; training techniques; adjustment problems

Designed as a source of reference for teaching, this book presents techniques and procedures used in the Child Amputee Prosthetics Project (School of Medicine, University of California at Los Angeles). The first chapter discusses the role of the medical director overseeing initial interviews with children and their parents, medical examinations, and prosthetic fitting. Orthopedic considerations, presented in chapter 2, cover surgical and nonsurgical aspects of treatment. The psychosocial problems of adjustment to amputation and prosthesis are described in chapter 3. The next two chapters cover preprosthetic evaluations and therapy. Prosthesis design and fitting for children are presented in chapter 6, and training in the use of the prosthesis for both upper and lower extremity amputees is described in the last two chapters. Photographs, charts, and diagrams of specific limb deformities and prosthesis devices are included. Both congenital and traumatic amputations are discussed. Growth patterns of children are discussed in terms of both normal development and development of the child amputee. The appendix includes samples of evaluation charts used in the Child Amputee Prosthetics Project. This document is available from the University of California Press, Los Angeles and Berkeley, for \$8.50. (GB)

Descriptors: exceptional child services; physically handicapped; identification; program planning; incidence; clinical

diagnosis; cerebral palsy; medical treatment; etiology; preventive medicine; medical evaluation; educational diagnosis; vocational education; community services; institutions; hospitals; homebound; medical services; clinics

Directed to persons in voluntary or official agencies and to planning groups whose decisions determine or affect the extent, coverage, content, and operation of community services to children who are handicapped by cerebral palsy, this guide has as its objectives to present background information on cerebral palsy as it affects the individual children, their families, and communities, to suggest policies, goals and methods of approach to the problem of cerebral palsy on both an individual and a community basis, and to outline practical ways of organizing services and community resources for the cerebral palsied. Basic concepts and facts about cerebral palsy, causes and preventions of the disease, casefinding, diagnosis, program planning, and methods of treatment and guidance are described. Special services and facilities at the community level and the organization of community resources are discussed. The need for program study and evaluation and the role of research are presented. The appendixes outline etiologic, medical, and educational classification of children with cerebral palsy, examine qualifications for professional personnel, and include an example of procedure in a diagnostic clinic session for children with cerebral palsy. Alpha Chi Omega Toy Book.

Alpha Chi Omega Fraternity, Indianapolis, Indiana

EDRS mf, hc

Alpha Chi Omega National Headquarters, 3445 Washington Boulevard, Indianapolis, Indiana 46205.

Descriptors: exceptional child education; physically handicapped; self care skills; instructional materials; manipulative materials; cerebral palsy; children; toys; psychomotor skills; perceptual motor coordination; skill development; games; handicapped

Patterns and directions are given for making self-help toys for cerebral palsied and other handicapped children. The toys are designed to entertain and to develop muscle coordination and finger-elbow dexterity, teach self-help skills such as dressing, stimulate visual perception, encourage hand grasps and eye-hand coordination, motivate speech, and give dramatic play. Illustrations and directions are given for the construction of 38 toys; 10 additional toys and 11 kits for play activities are also suggested. (DF)

Children's Bureau (DHEW), Washington, D. C.

EDRS not available

Descriptors: exceptional child education; special health problems; research needs; educational needs; genetics; heredity; vocational rehabilitation; research projects; adjustment (to environment); attitudes; family (sociological unit); parent role; medical treatment; mental health; psychological needs; psychological characteristics; injuries; Hemophilia

Improved medical and social procedures are reducing the disabling effects of hemophilia. However, the need felt for greatly increased multidisciplinary research, demonstration projects, and better coordinated referral services among participating professions is confirmed in 12 papers covering current concepts and aspects of hemophilia: social, parental, orthopedic, genetic, nursing, dental, psychiatric, educational, and vocational. Research on hemophilia is cited in texts and bibliographies. Findings to date

indicate excessive school and work absences, lower academic and vocational achievement relative to expectancy level, job discrimination, and lower income level for hemophiliacs. Overprotection and sheltering may account for these characteristics and might be greatly reduced by early identification and attention to educational, social, and psychological as well as medical problems accompanying hemophilia. The continuing need for some special services to hemophiliacs, ranging from donors to visiting teachers and nurses, should be better publicized and coordinated. Community education and parent, vocational, and marriage counseling should be directed toward building a concept of the hemophiliac as a potentially normal society member. A 22-item bibliography on psychiatric aspects is included. (CF)

Epilepsy and the Law; A Report on Legal Reform in the Light of Medical Progress.

EDRS not available

Hoebel Medical Division, Harper And Row Publishers, 49 East 33 Street, New York, New York 10016.

Descriptors: exceptional child education; special health problems; legislation; epilepsy; laws; civil rights; family (sociological unit); parent reaction; parent attitudes; state laws; marriage; employment; employment practices

Change in laws relating to epilepsy which have occurred from 1956 to 1966 are reported and compared. Areas considered include the nature of epilepsy and the effect of epilepsy upon the family. Areas of civil and criminal responsibility include law reform, and specific: legal aspects of and changes in eugenics; marriage laws, eugenic sterilization laws, driver's license laws, employment, and miscellaneous laws including immigration, insurance, institutionalization, education, civil liability, and criminal responsibility. Six appendixes include the Wisconsin and Ohio driver's license laws, recommended procedural and regulatory provisions for driver's licenses, a recommended medical form for driver's license applicants, the Ohio Statute on Encouragement of Employment of the Handicapped, and findings and recommendations of the original report. Burton, Lindy

Vulnerable Children; Three Studies of Children in Conflict: Accident Involved Children, Sexually Assaulted Children and Children with Asthma.

EDRS not available

Schocken Books Inc., 67 Park Avenue, New York, New York 10016 (\$6.50).

Descriptors: exceptional child research; emotionally disturbed; personality; behavior; environmental influences; per-

sonality tests; parent child relationship; traffic accidents; personality studies; personality problems; projective tests; socially deviant behavior; psychological needs; need gratification; self esteem; affection; crime; asthma; disabled; aged youth; family environment; delinquents

Three retrospective studies relate children's socially inappropriate behavior to needs for approval and self assurance. Four girls and 16 boys (a sex difference of p equals .006) involved in road accidents, aged from 5 to 15, who were consecutively admitted to a hospital for arm and leg fractures were matched with controls. The accident children shared a history of environmental stress and frustration, were more assertive and unsettled, and showed constitutional hyperactivity and lowered tolerance for stress. A study of sexual assault reported to the police involved 41 school-age victims, who were found to have significantly (p equals .05 less than .02) greater affection seeking behavior than the controls (four for each subject). It was concluded that this need set the stage for sexual acting out and, if the need were met legitimately, it would be outgrown and the assault would not affect subsequent personality development. A study of 25 consecutive child referrals to a desensitizing clinic and inpatient wards found these asthmatic children to be more unsettled than their matched controls (p equals .005), experienced more deviant maternal attitude (mothers more assertive, p equals .001), and viewed the environment as more threatening (p equals .005). Results thus suggested that the asthma attack was a protest against an over-dominant environment. (MM)

Syracuse University Press, Box 87, University Station, Syracuse, New York 13210 (\$6.00).

Descriptors: exceptional child research; physically handicapped; tests; perception; cerebral palsy; perception tests; children; visual perception; adolescents; tactual perception; neurologically handicapped; perceptually handicapped; test results; Syracuse Visual Figure Background Test; Binet Vocabulary Test; Tactual Motor Test; Marble Board Test; Fly Test; SVFB; Terman Merrill Intelligence Scale

A study of perception used a sample of 325 cerebral palsied children (211 were spastic, 114 were athetoid) and 110 normal children. All children were between 6 and 16 years of age and of normal intelligence. To investigate perceptual disturbances, six tests were administered--the Tactual Motor Test, the Syracuse Visual Figure Background

Test (SVFB), the Marble Board Test, a maze test, and two disc tests designed to measure tactual perception of geometric shapes. The Binet Vocabulary Test was used as a screening test and to establish rapport. Data were analyzed by comparing the three groups of subjects on each measure and determining relationships to chronological age and sex. Interrelationships among the perceptual measures were computed. Cerebral palsied subjects performed more poorly on the SVFB, the Marble Board, the Tactual Motor, and maze tests than did the normal subjects. Disc tests were easily performed by all subjects. Spastic subjects performed more poorly than athetoid subjects on the Marble Board and the SVFB Tests. All tests showed developmental trends and the effect of age was most pronounced for the Tactual Motor, Marble Board, and maze tests, and lower for the SVFB test. Generally, relationships between tests were low (except for Marble Board and Tactual Motor tests for the spastic group). In an additional study, the Lerman-Merrill Intelligence Scale Vocabulary Test, the Fly Test, the SVFB Test, a test of color vision, and an experimental figure-background test were administered to 401 spastic subjects aged 6 to 16 years. The spastic child's perception of figure increased with length of his observation time; more figure was perceived in color materials; perception was slightly better for three dimensional than for two dimensional materials; and more figure was perceived when a large figure on a large background was presented than with other combinations. A 96-item bibliography is included. (MY)

ABSTRACT 10990

Wilson, Dorothy Clarke
Handicap Race; The Inspiring Story of Roger Arnett.
EDRS not available
McGraw-Hill Book Company, 330 West 42nd Street, New York, New York 10036 (\$5.95).

Descriptors: exceptional child education; physically handicapped; achievement; family (sociological unit); academic achievement; productive living; amputees; orthopedically handicapped; rehabilitation; farmers; clergymen; senior citizens; family involvement; family relationship; adopted children; nursing homes; national organizations; employment; biographies; employer attitudes

Roger Arnett was a college student and record-breaking track runner in 1931 when an automobile accident paralyzed the lower part of his body. His biography describes how, with the help of family and friends and great determination, he overcame his despair and learned to live a full life from his wheelchair. His life with his wife, a childhood polio victim, and their three adopted children is presented; his accomplishments are described including completing college, working at various

jobs, growing and developing several new prize winning strains of gladioli, and becoming a minister to the physically disabled whom he visited in hospitals and nursing homes. Physical troubles such as many infections and ailments resulting from his paralysis, causing a leg amputation, and seriously threatening his health and life are discussed. His national achievements include getting Congress to establish a National Employ the Handicapped Week and actively promoting the American Federation of the Physically Handicapped. (LE)

New Hope for Dystrophies. Public Affairs Pamphlet 271S.
Public Affairs Committee, New York, New York
EDRS not available
Public Affairs Pamphlets, 381 Park Avenue South, New York, New York 10016 (\$0.25).

Descriptors: exceptional child research; special health problems; identification; etiology; diseases; disease rate; heredity; research projects; research utilization; dietetics; clinical diagnosis; genetics; services; medical research; medical evaluation; physical therapy; Muscular Dystrophy

A pamphlet discusses muscular dystrophy and research on it. New hope is mentioned from research done in the Metabolism Unit in the Institute for Muscle Disease in New York City. A description of types of muscular dystrophy (MD) includes PMD (pseudohypertrophic muscular dystrophy), facio-scapulo-humeral MD, and limb-girdle MD. Mobilization against MD by the Muscular Dystrophy Associations of America (MDAA) includes both basic and applied research and mention of special animals. The cause of MD is traced to a probable metabolic deficit and the role of enzymes, and enzymes and genes are discussed. Practical gains from research include early differential diagnosis and identification of the carrier. New developments described include the possibility of repairing a defective inheritance, utilizing new cell study techniques, turning genes on and off, and stimulating natural regeneration of muscle. Finally, the services of MDAA are described and the role of physical therapy is delineated. A selection of public affairs pamphlets as well as members of the Public Affairs Committee are listed. Epilepsy and the School Child.
Epilepsy Society Of Massachusetts, Boston
EDRS not available
Epilepsy Society Of Massachusetts, Room 204, 73 Tremont Street, Boston, Massachusetts 02108 (\$0.10).

Descriptors: exceptional child education; special health problems; epilepsy

Intended for the classroom teacher as well as others involved with the epileptic child, the booklet considers the incidence of epilepsy, types of epileptic seizures, causes of epilepsy, and what to do during a seizure. Also discussed are the precautions necessary for epileptic students, the effect of seizures on other pupils, types of educational handicaps accompanying epilepsy, medical treatment, and inservice teacher education concerning epilepsy. Six films on epilepsy are listed. (JD)

Proceedings Of The Workshop On Speech And Language Therapy With The Cerebral Palsied Child, Conducted At The Catholic University Of America, Under The Auspices Of The Director Of Workshops, June 11 To June 22, 1964.

Descriptors: exceptional child education; physically handicapped; speech handicapped; speech therapy; identification; cerebral palsy; clinical diagnosis; etiology; language handicapped; speech habits; neurologically handicapped; learning characteristics; rehabilitation

To enable the practicing speech and hearing clinician to learn procedures of diagnosis and therapy to be used with the cerebral palsied child, the conference treats the following topics: neurological concepts pertaining to the cerebral palsied child, language disorders in children as a component of the spectrum of cerebral dysfunction, and psychological problems contributing to learning disorders in cerebral palsied children. Also considered are differential diagnosis in speech and hearing with the cerebral palsied child, research in speech problems associated with cerebral palsy and implications for the young cerebral palsied child, speech and language educational needs and procedures used with the cerebral palsied child, and speech and language therapy for the cerebral palsied child, reflex therapy and cerebral palsy habilitation. United Cerebral Palsy Associations, Inc., 321 West 44th Street, New York, New York 10036 (\$0.10).

Descriptors: exceptional child services; physically handicapped; neurologically handicapped; cerebral palsy; family problems; financial support; residential care; social welfare; insurance programs; personal care homes; health insurance

Intended for parents planning for the needs of children with cerebral palsy, the pamphlet discusses starting to plan for the future, including evaluation, information sources, and follow through and followup. Also considered are where to live and what to do and how to pay for care (the following are mentioned: Social Security, disability benefits, aid to the permanently and totally disabled, veterans' benefits, insurance, and trusts). Means of providing protective supervision are reviewed as are the need for and function of a protective service and the importance of the parents' legal wills. Appended are a list of 42 references and definitions of 33 terms. (LE)

of hearing; speech handicapped; orthopedically handicapped; cardiac (person); homebound; hospitalized children; agencies; partially sighted; multiply handicapped; educational programs; clinical diagnosis; rehabilitation; special services; parent child relationship; occupational therapy; aphasia; leprosy; muscular dystrophy; tuberculosis; Hansens Disease

Current thinking and methods in special education as they relate to the physically handicapped and in individuals with health problems are presented. The physically handicapped considered include the blind, the partially sighted, the deaf, the hard of hearing, the speech defective, the orthopedically handicapped, and the cardiopathic; special health problems examined include multiple handicaps, Hansen's Disease (leprosy), muscular dystrophy, tuberculosis, and those of the homebound and hospitalized. Various facets of the problems, the nature of the disorders themselves, and characteristics of the handicapped child, are described. Psychological, emotional, and social implications are discussed, as are methods of therapy, rehabilitation techniques, educational programs, teaching methods, vocational training and guidance, roles in employment, and current issues. Listings of relevant agencies, periodicals, and bibliographies are provided. (SN)

State University Construction Fund, 194 Washington Avenue, Albany, New York 12210.

Descriptors: exceptional child education; handicapped children; design needs; campus planning; college buildings; educational facilities; facility guidelines; dormitories; sanitary facilities; building design; physically handicapped; visually handicapped; aurally handicapped; parking facilities; fire protection; State University of New York

Guidelines on performance criteria for the State University of New York consider two main types of handicapped: the ambulant and semi-ambulant, including some physically handicapped, the visually and aurally handicapped, and persons with cardiac conditions; and persons confined to wheel chairs. The handicapped and planning for them are discussed. Specifications are detailed for the following aspects of exterior design: entrances, ramps, stairs, doors, walks, intersections, gratings and manholes, parking, and bus service. Interior design criteria cited are for general university facilities, restrooms, bedrooms, stairs, elevators, doors, conveniences, and fire protection. Persons involved in or con-

tributing to the study are named, and 19 references are listed. (JD)

Descriptors: exceptional child services; special health problems; cardiac (person); identification; community programs; preventive medicine; public health; community resources; special services; program evaluation; medical treatment; family counseling; family health; program planning; etiology

A general philosophy of services for children with special problems is discussed, and principles and practices on which community programs may be based are outlined. Discussed are facts about heart disease in childhood, the causes and prevention of handicapping heart conditions, case findings, diagnosis and planning for care, aspects of treatment and rehabilitation, special services and facilities available, organization of community resources, research in the field, and program evaluation. Appendixes include suggested drug schedules for streptococcal infections, forms of organic heart disease in children, Jones' criteria for diagnosing rheumatic fever, classification and reporting of cardiac conditions in children, and a list of 38 national, state and local agencies interested in community heart services for children. Opening New Doors to the Cerebral Palsied Through Day Care and Development Centers.

United Cerebral Palsy Associations, Inc., New York, New York

EDRS mf,hc

United Cerebral Palsy Associations, Inc., 321 West 44th Street, New York, New York 10036.

Descriptors: exceptional child services; day care services; cerebral palsy; neurologically handicapped; physically handicapped; physical facilities; financial support; admission criteria; clinical diagnosis; recordkeeping; transportation; psychological evaluation; instructional materials; communication skills; perceptual motor learning; self concept; scheduling; mentally handicapped; adult education; professional personnel; parent counseling

Designed for United Cerebral Palsy Association affiliates who are operating or planning to operate day care or development center for severely and multiply disabled individuals, this pamphlet considers several aspects of such a program. Administrative considerations focus on sponsorship, operating policies, licensing standards for space and equipment, physical facilities, finances, fees, admissions, discharges, records, transportation, health, and program evaluation. Suggestions for evaluation of participants includes gathering social and developmental history, and medical and psychological evaluations. Programming for both day care and developmental classes is explained and covers the kinds of individuals served, the needs of the individuals, goals (including skills to be taught), and activities. In addition information is provided on methods, scheduling, expectations, and pitfalls. Special considerations are given for adult programs, staffing, and services to parents (feelings and attitudes, participation, future planning). Includes summaries of findings at functioning centers, plant and equipment standards, physical facilities, food care, and a 36-item bibliography. (RJ)

design; instructional materials; classroom furniture; offices (facilities); facility requirements; physical design needs; furniture design; special health problems; physical facilities; space utilization; preschool children; design needs; educational facilities

A developmental setting for multi-handicapped preschool children and the physical layout of the classroom are described. Photographs and drawings of specially designed educational equipment, such as a shallow sand and water table adapted for wheelchair-bound children and an adjustable easel that allows armless children to paint with their feet, show the use of the materials and their design construction. Commentary is included which describes the function and purpose of each learning material along with the history of the school, its medical setting, and the educational philosophy of the program. Goldsmith, Selwyn

Designing for the Disabled.

Royal Institute Of British Architects, London

EDRS not available

RIBA, 66 Portland Place, London W1, England.

Descriptors: exceptional child services; physically handicapped; building design; architectural programming; facility requirements; design needs; space utilization; physical facilities; facility guidelines; doors; heating; sanitary facilities; lighting; communications; flooring; physical design needs; psychological design needs

Implications of the merits of normality and independence for the disabled, and their relevance to architectural design criteria are discussed. The introduction reflects the philosophical approach to the design and construction of public buildings and housing. Nine principle sections provide data and recommendations on the following topics: anthropometric considerations of disabled people; building elements and finishes (staircases, handrails, windows, doors, floor finishes); service installations (refuse disposals, heating, electrical services, communications, mechanical installations); general spaces (entrances, kitchens, living and dining rooms, bedrooms, sanitary accommodations, laundry, garages); public buildings (office buildings, transport, health, recreation, auditoriums, schools, hotels); and domestic housing (planning of dwellings, check list of recommendations). An appendix lists cost implications, definitions of terms, selected references, bibliographical references, and organizations associated with the welfare of the disabled. Illustrations with dimensions given in feet and metric equivalents are provided. (WW)

Nutrition and Intellectual Growth in Children.

Association For Childhood Education International, Washington, D. C.
 EDRS not available

BULL-25-A

Association For Childhood Education International, 3615 Wisconsin Avenue, N. W., Washington, D. C. 20016 (\$1.25).

Descriptors: exceptional child research; disadvantaged youth; nutrition; child development; intellectual development; educational needs; health; food; economic disadvantage; incidence; diseases; poverty programs; foreign countries; school programs; federal aid; government role; biochemistry; infants; dietetics; mothers; mentally handicapped; mental retardation

A consideration of nutrition and intellectual growth opens with a glossary of 12 terms and two reports on hunger in America, one by J.L. Frost and B.L. Payne, the other by the Citizens' Board of Inquiry into Hunger and Malnutrition. Included are articles on nutrition and intellectual development in children, by M. Winick; maternal diet, growth, and behavior, by M. Simonson and B.F. Chow; international nutrition and later learning, by M.C. Latham; and medical care of children in Poland, as told to H.T. Suchara. Also, D. Rosenfield and F.J. Stare discuss nutritional prospects for the future; M.L. Cronan describes the role of the school in providing for nutrition; and M.J. Brennan treats conservation, resources, and education. (JD)

Specialized Placement of Quadriplegics and Other Severely Disabled. Final Report.

New York University, New York, Institute For Physical Medicine And Rehabilitation

Vocational Rehabilitation Administration (DHEW), Washington, D. C.

EDRS mf, hc

VRA-RD-509

Descriptors: exceptional child research; physically handicapped; vocational adjustment; vocational rehabilitation; medical services; special services; group counseling; occupational surveys; job placement; orthopedically handicapped; demonstration projects; employment services; counseling services; employment experience; adults; statistical surveys; quadriplegia

To help quadriplegics and other severely disabled achieve vocational placement and confront the catastrophic impact of quadriplegia on bodily function (as detailed in the report), a rehabilitation team provided medical, various special, and vocational rehabilitation services.

The 100 clients (59% men, 79% less than 45 years and 62% between 20 and 39) were evaluated for physical capacities and job-task performance. Of the 100, 62 received and completed intensive training services, including vocational adjustment training, psychosocial services, and group counseling. Various job placement and promotion techniques were utilized. Of these 62, 25 were quadriplegics, 23 of whom were placed in gainful employment. Of the remaining 37 who had various degrees of severe disability, 30 were placed. Also part of the project was a mail survey made to determine the current employment experience of the quadriplegic. Of 355 persons contacted, 177 responded, of whom 69 were employed and 18 were attending college. Further descriptive data, six case studies, four recommendations, and 12 references are included. Housing for the Physically Impaired; a Guide for Planning and Design.

Department Of Housing And Urban Development, Washington, D. C., Housing Assistance Administration

EDRS mf

Superintendent Of Documents, U. S. Government Printing Office, Washington, D. C. 20402 (\$0.45).

Descriptors: exceptional child services; physically handicapped; low rent housing; architectural programming; design needs; building design; federal aid; incidence; site selection; parking areas; landscaping; doors; corridors; sanitary facilities; equipment storage; food handling facilities; climate control; lighting; telephone communication systems; community rooms; safety equipment; older adults; United States Housing Act of 1937

Problems involved in providing homes for independent living for the physically handicapped, health impaired, or older adults are considered. Basic concepts of low rent housing preface a discussion of neighborhoods and site selection, access, ramps, pedestrian walks, parking, landscaping, and lighting. Guides for building design focus on entrances, corridors, stairs, elevators, incinerator chutes, laundry facilities, general storage, and mailboxes. Specifications are suggested for living units including the living room, kitchen, bedroom, bathroom, and storage area; the design of windows, doors, hallways, floors, lighting and heating units, and custodial quarters, and the provision of telephones, televisions, an emergency signal system, and hot water are also treated. Recommendations are made for the following community areas: lounge, recreation room, kitchen, craft area, library, health clinic, washrooms, public telephones, drinking fountains, vending machines, and other areas. A bibliography lists 41 references. (RJ)

MacMillan Company, 866 Third Avenue, New York, New York 10022.

Descriptors: medical evaluation; medical treatment; medicine; physical handicaps; physical health; diseases; emotionally disturbed; visually handicapped; aurally handicapped; mentally handicapped; neurologically handicapped; pathology; neurological defects; cardiovascular system; physiology; cardiac (person); amputees; anatomy; physiology; metabolism; neurology

Designed as an informative but not overly technical aid, the volume is aimed at graduate students and professional workers in fields where medical knowledge is necessary but normally not included in formal education. Each disease or disability is defined, diagnostic aids specified, and treatment outlined. Areas discussed are diseases of the heart and blood vessels, respiratory disorders, bone, joint, and muscle disorders, gastrointestinal problems, kidney diseases, endocrine gland disorders, brain disorders, and disorders of the central nervous system. Also included are hearing impairments, visual handicaps, neoplasms, amputations, emotional disturbances, and aspects of mental retardation. Each chapter was written by a specialist in the field discussed and is autonomous. (JM)

Descriptors: handicapped children; physically handicapped; parent child relationship; parent role; rehabilitation; medical services; educational needs; employment opportunities; recreational activities; social adjustment; sex education; self care skills; prostheses; family problems; educational programs

Written basically for parents of handicapped children, the book offers suggestions for care, advice on behavior, and discusses the needs of both parent and child. Some areas of concern are understanding of parent and child problems in daily family living, the relationship and search for medical care, hospitalization and therapy, parental emotions concerning the child's education, educational needs and facilities, and problems in actual school situations. Information is also presented on possible employment, parental influence in choosing a vocation, attainment of goals, suggestions for recreation and play activities, and sexual and social development problems from childhood through adulthood. Also discussed are problems in home management, some self help aids, and suggestions for the easier management of braces, wheelchairs, crutches, artificial limbs, and elimination processes. Suggested readings and a list of helpful agencies are provided. (JM)

Studies in Reaction to Disability. XII: Structure of Attitudes Toward the Physically Disabled; Disability Factor Scales--Amputation, Blindness, Cosmetic Conditions.

New York University, New York, School Of Education

Social And Rehabilitation Service (DHEW), Washington, D. C., Division Of Research And Demonstration Grants
EDRS mf,hc

Descriptors: exceptional child research; physically handicapped; attitudes; negative attitudes; amputees; blind; demography; factor analysis; attitude tests; stereotypes; test construction; internal scaling; item analysis

To describe and to develop instruments to measure attitudes toward amputees, the blind, and those with cosmetic conditions, three groups of subjects responded to one of three large pools of items tapping attitudes toward the three disability conditions. Three new groups of about 500 subjects of diverse demographic characteristics were given one of three revised and reduced questionnaires. The returns were factor analyzed and scales were derived from the resulting factors. The seven virtually identical factors which emerged from the amputation and blindness analysis were interaction strain, rejection of intimacy, generalized rejection, authoritarian virtuousness, inferred emotional consequences, distressed identification, and imputed functional limitations. The cosmetic conditions item set contained two factors which were identical (interaction strain, rejection of intimacy); two which were analogous (reluctant aversion and superficial empathy); and two unique dimensions (qualified aversion and proximate offensiveness). A review of related research and data on each item of the scales are included. (LE)

 Office Of Education (DHEW), Washington, D. C., Bureau Of Education For The Handicapped
 EDRS mf,hc
 OEG-32-42-8145-5020
 BR-5-0412

Descriptors: exceptional child research; physically handicapped; academic achievement; personality; intelligence; reading achievement; arithmetic; amputees; psycholinguistics; intelligence differences; individual characteristics; prostheses; social factors; student placement

To measure school achievements in spina bifida children, to relate these measures to certain variables, to obtain information on educational problems, and to study facets of cognition and its changes with age, 77 spina bifida children and 53 amputees (all aged 5 to 15) were tested. Sixty non-disabled children were at times used for controls. The findings indicated that children with spina bifida and hydrocephalus lagged behind other handicapped children in reading, arithmetic, psycholinguistic abilities, richness of interpersonal recall, and listing of occupations. The spina bifida hydrocephalic children showed better performance in verbal ability than in performance skills and tended to act socially deprived regardless of verbal intelligence. Non-hydrocephalic and amputee children seemed to show normal social awareness. Indications are that spina bifida children need earlier attention to avoid misplacement in academic levels and to help prevent cognitive and academic problems. Extensive appendixes and tables are provided. (Author/JM)

Independent Living: A Study of Rehabilitation of Physically Handicapped Adults Living in Foster Homes; Social Work Intervention in the Adaptation to Family Environment. Final Report.

New York Service For Orthopedically Handicapped, New York
 Social And Rehabilitation Service (DHEW), Washington, D. C.
 EDRS mf,hc

Descriptors: exceptional child services; physically handicapped; program evaluation; foster family; rehabilitation programs; adults; orthopedically handicapped; family environment; institutionalized (persons); social services; social adjustment; social workers; success factors; counseling effectiveness; interpersonal relationship; family influence; vocational counseling

As an alternative to unnecessary inpatient care of adults with orthopedic disabilities, the Independent Living Project (ILP) placed persons who were institutionalized without need and persons who were living in the community under unsatisfactory circumstances in foster homes. Information is presented on the intake procedures, homefinding techniques, matching client to foster home problems, counseling services, and the employment procedures used in the

project. The characteristics of the ILP clients and foster families and the effects of social work intervention are enumerated with summary tables of data clarifying the placement results. Nine major areas of concern were identified. Each area is delineated with a list of recommendations and implications. These include the procedures for moving the disabled into suitable environments, the applicability of foster homes for the disabled, the alternatives for living environments, the opportunity to participate in training for social skills, the compilation of a central record file or data bank, the effect of the work experience and its importance, the cooperation of community organizations for the disabled, the need for the coordination of personnel services, the allocation of personnel and types of services offered, and final conclusions.  W. B. Saunders Company, West Washington Square, Philadelphia, Pennsylvania 19105.

Descriptors: physical education; diseases; exercise (physiology); muscular strength; physical fitness; human body; human posture; anatomy; administrative problems; anomalies; physical handicaps

An introduction to corrective physical education considers current emphases in conditioning and new emphases in tests and measurements. A review of anatomy and the mechanics of human movement covers general body structure, the foot and lower leg, knee and hip joints, the spine, trunk muscles, thorax and abdomen, and the shoulder and upper arm. Physiological, neurological, and psychological considerations are explored as are postural weaknesses and other growth and development problems. Exercise is discussed in relation to disease and impairment, and corrective exercises are both described and illustrated. Also treated are tension and techniques in relaxation and the administration of a corrective physical education program. (RJ)

OEG-2644
BR-5-0410-4-11-3

Descriptors: exceptional child research; physically handicapped; educational research; educational needs; curriculum development; personnel selection; program evaluation; transportation; school design; educational equipment; research reviews (publications); educational programs

To provide information on educational modifications for physically disabled children, a review of over 800 documents was evaluated, extensive interviews were conducted, and correspondence was gathered. The information was compiled and evaluated by the Human Resources Center and presented in five monographs dealing with school design, educational equipment, transportation, staffing, and curriculum and instructional techniques for physically disabled students. Each discussion presents problems and suggests solutions. The conclusions of the total project were that dissemination of this collated information can result in better educational techniques; there is much creative thinking currently, but lack of communication hampers adoption of new techniques; and more surveys of information are needed concerning individual exceptionalities. Summaries of the monographs are provided. (JM)

Telephone Services for the Handicapped. Rehabilitation Monograph XXXVII.

New York University, New York, Medical Center
American Telephone And Telegraph, New York, New York
EDRS mf,hc

Descriptors: exceptional child services; physically handicapped; telephone communication systems; equipment utilization; audio equipment; sensory aids; equipment evaluation

A study by American Telephone and Telegraph investigated the use of standard Bell equipment in meeting the needs of the disabled for telephone service. Results revealed that all disabled persons who are able to communicate orally can initiate and terminate a call and carry on a conversation when the correct types of equipment are found, especially when push button dials are universally available or when an operator is available. The monograph presents information on the difficulties encountered in using the phone and on equipment found useful. Each phone, headset, or modification is described through words and by photographs; advantages and disadvantages are noted. Several factors influencing the choice of telephone equipment (answering in time, access, and family use) are considered. Evaluation of the patient and the equipment is discussed in regard to the amount of physical function present and the testing and matching of equipment for various disabilities. Choice of telephone, assistive devices, special services for summoning aid, use of the phone for home business, and coin phones for wheelchair users are also mentioned. (RJ)

(Suggestions and Solutions to Problems of Maneuverability for the Physically Limited Homemaker.)

Nebraska Heart Association, Omaha
Nebraska University, Lincoln, College Of Agriculture And Home Economics
EDRS not available
Nebraska Heart Association, 430 South 40th Street, Omaha, Nebraska 68131.

Descriptors: physically handicapped;

physical facilities; homemaking skills; home management; housewives; cleaning; self care skills; object manipulation; food handling facilities; sanitary facilities; clothing; design needs; equipment storage

A series of 10 pamphlets is designed to give the physically limited homemaker suggestions and practical solutions to problems of maneuverability in the home. Each bulletin is illustrated; topics include a discussion on easy to use kitchens, suggestions for an easy to use mixing center, ideas on an easy to use cooking and serving center, materials geared for an easy to use sink center, and suggestions on kitchen storage facilities which require no stooping or stretching. Other bulletins cover the subjects of food and the family, fashions for physically limited women, ways to streamline household tasks, methods to make the bathroom safe and usable, and suggestions on the convenient organization of cleaning equipment. Greene, Raymond, Ed.
Myasthenia Gravis.
EDRS not available
J. B. Lippincott Company, East Washington Square, Philadelphia, Pennsylvania 19105 (\$6.00).

Descriptors: exceptional child research; special health problems; medical evaluation; medical treatment; neurological defects; muscular strength; physiology; pathology; fatigue (biology); radiation biology; Myasthenia Gravis; endocrinology; thymus

A book of readings on myasthenia gravis covers both scientific and clinical aspects of this neuromuscular disorder. It is designed to be of special interest to physicians, physiologists interested in nerve and muscle disorders, radiologists, and immunologists. A history of myasthenia gravis introduces chapters discussing the physiology of neuromuscular transmission, the diagnosis of the disease, and the use of radiology and electromyography in diagnosis and treatment. Other topics covered are pathology, endocrinology, and immunology as they relate to the disease, and the role of the thymus in neuromuscular transmission. Finally, descriptions of medical, surgical, and radiological treatment are presented. Numerous tables, drawings, photomicrographs, electron micrographs, and other photographs are included. (KW)

Home Care of the Child with Rheumatic Fever: A Guide for Parents.

EDRS not available
American Heart Association, 44 East 23rd Street, New York, New York 10010.

Descriptors: special health problems;

homebound children; child care; parent role; nursing; rheumatic fever

The booklet gives parents practical suggestions on how to care for a child convalescing from rheumatic fever at home. Topics include the child as a patient, arranging the child's room, home nursing care, clothing, meal preparation, a daily schedule, equipment needed, and improvising equipment. Five suggested readings are listed. (I.E)

What Teachers Should Know about Children with Heart Disease.
EDRS not available
American Heart Association, Inc., 44 East 23rd Street, New York, New York 10010.

Descriptors: exceptional child education; physically handicapped; cardiac (person); educational methods; regular class placement; teacher role

Designed for the classroom teacher, the booklet offers information on teaching children with heart diseases. Areas discussed include rheumatic fever, its effects, danger signals, phases, and treatment; the return to school; the role of health education; and congenital heart defects, cyanosis, and heart surgery. Additional areas of concern are restricted programs of activity, psychological and emotional needs, guidance and vocational counseling, and teacher reassurances. (JM)

Teaching the Physically Handicapped to Swim.
EDRS not available
Transatlantic Arts, Inc., North Village Green, Levittown, New York 11756 (\$3.75).

Descriptors: exceptional child education; physical education; swimming; physically handicapped; teaching methods; visually handicapped; aurally handicapped; cerebral palsy; swimming pools; physical education facilities; exercise (physiology); physical therapy

First principles of teaching swimming to the handicapped are reviewed; attention is given to children with cerebral palsy or muscular dystrophy, physical handicaps, blindness, and deafness. Swimming strokes, suggested exercises, group teaching, and a typical sequence of lessons and exercises are considered. Some case histories and a plan for a learners' pool are provided. (JD)

The Pregnant Teen-Ager: A Medical, Educational, and Social Analysis.
EDRS not available
Charles C Thomas, Publisher, 301-327

East Lawrence Avenue, Springfield, Illinois 62703 (\$6.75).

Descriptors: unwed mothers; adolescents; social problems; educational problems; pregnancy; illegitimate births; medical evaluation; sex education; contraception

Concerned with teen-aged pregnancy, the text includes discussions of premarital pregnancy, the pregnant teen as a member of the poor, as nonwhite, and as a teen-ager, obstetrical concepts, pregnancy results, factors which influence medical prognosis, and solutions to minimize medical risk. Additional areas of concern are a research review and a review of the validity and bias of social services, hospitals and clinics, voluntary agencies and homes, the community itself, and the attitudes of the community. The emotional problems of the school system and exclusion from the system are described along with a review of the educational backgrounds of pregnant students, educational needs, and the Y-MED program. The problems of sex education and contraception availability and the results of insufficient instruction are examined as are the following concerns on abortion: laws, historical perspective, prohibitions, women's rights, and the punitive effects of legislation on the poor concerning abortion. Wheelchair to Independence: Architectural Barriers Eliminated.
EDRS not available
Charles C Thomas, 301-327 East Lawrence Avenue, Springfield, Illinois 62703 (\$6.75).

Descriptors: physically handicapped; architectural barriers; building design; wheel chairs; physical environment; interior design; campus planning; school design; home furnishings

Means of eliminating architectural barriers for wheelchair users, to help solve some problems of daily living, education, and employment, are suggested and recommended to architects and builders. Architectural obstructions in both residential and public buildings are outlined, together with solutions. The book discusses adaptations for the home (bathroom, bedroom, kitchen, dining room, floors, stairs), and various types of residences. Photographs illustrate many of the conveniences. Specifications for a made-to-order house for a wheelchair user are presented. Lists of recommended standards for public buildings and of motels with wheelchair units are included in a discussion of current building trends. A review of campus facilities at colleges and universities includes suggested specifications for structures and a list of institutions currently enrolling wheelchair students. Adaptations for public schools, hospitals, and the telephone are also suggested. (KW)

Residential Care Needs: A Report to the California State Legislature.
California State Department Of Public Health, Berkeley
EDRS mf,he

Descriptors: exceptional child services; physically handicapped; residential care; state programs; health services; program proposals; California

A study of 115 mentally normal persons with severe physical handicaps indicated that existing service and living arrangement programs were inadequate. Results suggested the following: establishment of a coordinating state agency and local supervisory teams of nurses and social workers; arrangement of a variety of living accommodations, including temporary care for persons ordinarily living at home; and provision of funds for equipment and home modification. Further recommendations called for a health oriented community agency stressing preventive care, attendant care programs, and protectorship services. Also needed were flexible interpretation of regulations governing existing programs and case management developing and utilizing the abilities and talents of the handicapped. (JD)

Basic Mechanisms of the Epilepsies.
EDRS not available
Little, Brown And Company, 34 Beacon Street, Boston, Massachusetts 02106.

Descriptors: exceptional child research; physically handicapped; epilepsy; neurology; seizures; physiology; biochemistry

A collection of highly technical scientific articles by international basic and clinical neuroscientists constitutes a review of their knowledge of the brain and nervous system, particularly the aspects

related to loss of brain function control and its explosive discharges which cause epileptic seizures. Anatomy, biophysics, biochemistry, and physiology of brain and neuronal structures and mechanisms are discussed. Included are studies related to seizure mechanisms and therapeutic

agents by neurochemists and neuropharmacologists, and information from physiologists on normal and seizure processes in cells and collections of neurons in the brain. Also reviewed are the principles of genetic and other causative factors of seizures. The data and

concepts relative to epilepsy presented in the monograph are designed to provide further understanding of the nervous system to basic scientists, and assistance in developing more effective therapy to clinicians. (KW)
